Software Features

Legend: Strongly Disagree ■ Disagree ■ Neither Agree nor Disagree ■ Agree ■ Strongly Agree

Categories (top to bottom):
- I struggle to compose drum patterns.
- I often find myself reusing the same drum patterns and would prefer not to.
- I would like a tool to compose the entire drum portion of a song for me.
- I would like a tool to generate short drum loops to provide inspiration.
- I would like a tool that extends or fills out an existing drum pattern I have composed.
- I would like a large variety of drum patterns to be generated, even if they do not all conform to the style of music I am…
- I would like the drum patterns generated to generally conform to the genre of music I am producing.
- I would like control over how conventional or experimental the drum patterns outputted are.
- I would like control over the length of the pattern generated.
- I would like control over which drum hits are included in the pattern generated.
- Humanisation of the drum patterns generated is important to me (for example, through MIDI note velocity changes).
- I would like the tool to output the drum patterns visually (as seen above).
- I would like the tool to output the drum patterns as MIDI files.
- I would like the tool to output the drum patterns as audio files.
- Direct integration with my DAW (i.e. as a VST plugin) is essential for a composition tool like this.
- I am happy to import the drum patterns (in MIDI or audio format) into my DAW from elsewhere on my computer.
- Presentation of the software is important to me.
